ABOUT US

Leaders International School (LIS), under the aegis of Leaders Education & Welfare Society and Little Leaders Play School under its tow, is an innovative social enterprise with a vision to transform Indian Education System. The school is promoted by alumni of IIT-IIM and professionals having more than 50 years of experience in the field of education. Leaders International School is set up with a single purpose of providing world class education in a culturally sound environment; imbibe right values while being conscious about love & protection that is needed for a healthy body, mind and soul.

Leaders International School has a Primary Wing, Little Leaders Play School which is flourishing PAN India and has been growing exponentially since its inception in 2012. It has won many awards and has industry recognized curriculum.

VISION

It is the aim of Leaders International School to inspire all our children to explore their imaginations and captivate the essence of their dreams and become a leader in all the spheres of life.

MISSION

Our mission is to create lifelong leaders. Leaders International School is dedicated towards imbibing moral, spiritual and ethical values in each child. We not only focus upon teaching a concept but create environment where children can hone their own skills and potential.

CURRICULUM

In the changing world, where education is evolving every moment and so is learning, it is time to re-examine the teaching-learning process. We need to place the “Child is the Curriculum” in a fresh perspective. Every child is unique and has his/her own way of acquiring knowledge, attitudes, values and skills. The charm and challenge lies in how effectively an educator can address every child's diversified learning need and sense of enquiry, to enable a child to discover, derive and further explore.

LIS integrated curriculum is a thematic learning programme that builds on the child's existing knowledge through establishing a correlation with different domains of learning. It transports them to a higher level of thinking & provides them with a plethora of opportunities to be meaningfully engaged in tandem with their interests and intelligences. This gives the children multiple ways of expressing themselves.

Education is not about making them literate, restricting them to writing and reading; it's about expanding their mental horizons, broadening their thinking, enriching their experiences, empowering them with knowledge and skills, inculcating values, developing their personal and social skills, making them self-reliant and regulated, imparting awareness about health and safety, building a sense of physical wellness, igniting their enquiry skills and creating a need for citizenship. It is necessary for them to be technologically savvy and strengthen their mathematical acumen, in order to make them the prospective leaders of tomorrow.

Therefore, we have formed several clubs which includes:

- **Dance & Music Club:** This club caters to all the famous dancing styles, Vocal and Instrumental forms.
- **Sports Club:** Qualified trainer to provide coaching in both indoor and outdoor games.
- **Artistic Hands Club:** This club helps children to explore their creativity through sculpture, model making and art & craft activities.
- **Fitness Club:** Being Fit & Healthy is today's mantra. We focus on physical as well as mental health of the children. We have Yoga, Aerobics & PT for all the classes.
- **Photography Club:** Children are very expressive these days when it comes to click a picture. To hone their skills in this form of art, we have trained professional for this club.

MATERIALS AND RESOURCES

Every learning classroom, whether it is in a home environment or centre based setting must be a comfortable, safe and nurturing environment where children can interact with manipulatives and materials to enhance skill development. Our children discover and understand Science, Social Studies and Math information when they actively explore materials and ideas that are guided by teachers who intentionally design activities that engage children in critical thinking and processing.

INSTRUCTION

In LIS, learning occurs within the context of play and active learning strategies where children are engaged in concrete and hands – on discovery, experimentation and interaction with materials, their peers and nurturing adults.

LIS educators help construct knowledge during these active learning times by designing activities that build on children's prior knowledge to create understanding and information.

FRAMEWORK

Our curriculum is based on the National Curriculum Framework that reminds us as to what information should be given within each of the Key Learning Areas.

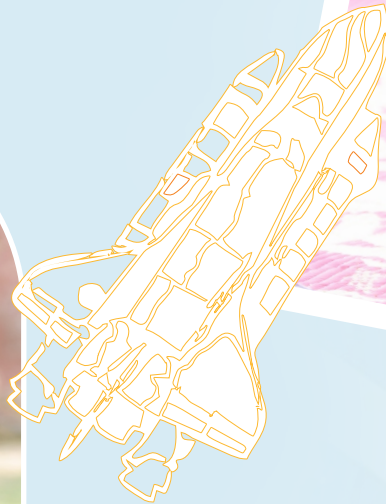

CLEAR STANDARDS

Our school's standards are based on the National Curriculum Framework and built on information learnt previously creating a continuum of learning and linked learning that begins in infancy, gradually getting more challenging as it extends through high school.

The instruction is based on the following pedagogies and approaches:

- Bloom's Taxonomy of Learning
- Reggio Emilia's Fundamental Principles
- Jean Piaget's Theory of Cognitive Development
- Howard Gardner's Model of Multiple Intelligence
- Maria Montessori's Methods of Education
- Kohl Berg's Theory of Social Development
- Erikson's Theory of Social Development
- Vygotsky Zone of Proximal Development
- Baron – Cohen's Theory of Mind
- 21st Century Skills
- Constructivist Theory
- TPACK
- SAMR
- Whole Brain Theory and many more.

INTERVENTIONS

Our educator observes and assesses children's abilities, interests and achievements using standards as a guide. The interventions are a part of everyday's practice. The educator revises activities, adjusts lesson plans and accommodates children's individual difference which allows children to master skills at their own pace.

CORE STRENGTHS

- **INNOVATIVE STEM LAB:**

We engage students in high quality, hands-on working and understanding STEM (Science, Technology, Engineering and Mathematics) and provide world class learning experiences.

- **SMART TECHNOLOGY ENABLED CLASSROOMS:**

Most of the classrooms in Leaders International School are technology enabled. Our Smart Classroom have multiple integrated devices that are connected for enhanced teaching methodologies.

- **E-Curriculum:**

We provide an online access to all the students to revise the concepts taught in classroom at home and do revision exercises too to improve their understanding on any topic.

- **3-D LAB:**

In a 3-D lab, the children can print the objects in 3-D that they can imagine and decide its feasibility on their own and explore their imagination. This promotes healthy and educative learning.

PARENT'S SPEAK

I am immensely pleased to state here that my son is going through metamorphosis under the able and extremely sincere teachers and support staff. There is a tremendous growth observed in last three years in my son. The very well planned syllabus and educational activities adds stars★ in my child's education. I convey my best wishes to the School, Branch Head & the teachers.

- Parent of Akshiv Swaroop

School ambience is very good ,class rooms are very attractive . Staff is very cooperative and concentrate on every child personally . Children learn a lot of things through the activities conducted in the school. Curriculum includes all dimensions of knowledge and learning. Overall I am very satisfied being the part of the school.

- Parent of Vyom

The overall experience is very good. Teachers and staff are supportive and friendly and we are highly satisfied with the school.

- Parent of Vaanya

We are very happy to be part of the school as parents. I appreciate the teachers for their full attention towards the education of kids. We get regular updation of kid's activities, photos and videos. We congratulate Little Leaders for their efforts and wish to be their part as a parent in future also.

- Parent of Daksh Rajput

I'm very happy to get my child admitted in this school. Tanvi's class teacher is very good ,the staff here is very good ,here children are taught good things and new activities are conducted to explore and learn.

- Parent of Tanvi

Leaders International School is one of the best school in Ghaziabad. Their method of teaching is very effective. Children's knowledge is enhanced by practical experiences. School staff is well trained. They improve their students with a positive approach. We love the method of teaching of the school.

- Parent of Adhrit Tyagi

Leaders International School is a wonderful school with very personable, dedicated and caring staff. Through the teacher's guidance and structured activities we have watched the confidence grow and important social skills develop in my child. I am very thankful to the teachers and staff for the wonderful environment they have provided for the school.

- Parent of Shanaya

I am very grateful to the school for giving a homely environment to my child. School staff is very friendly and helpful. The activities are nurturing the children in the best way possible. Special thanks to Ms. Divya for her level of dedication and patience.

- Parent of Shreya Khutail

A good blend of educations and etiquette. A balance blend of extra and co-curricular activities. My child has really achieved so much in short span of three years. Her classroom is well arranged and managed by a very qualified and humble teacher (Divya ma'am). We wish that the school continues it's journey towards providing quality education to all it's students.

- Parent of Anaya Prasad
